

# TRAINEE PROGRAM AT BENDIRO PROFILE TECH

Become a Trainee at Bendiro Profile Tech  
– Where the Metal Profiles of Tomorrow Are Created

**At Bendiro Profile Tech AB, we create customized solutions based on metal profiles for industrial clients and wholesalers – with Europe as our primary market. We take pride in combining cutting-edge technical expertise with smart and sustainable solutions, always keeping the customer at the center.**

We've now taken a major step into the future with our brand new and state-of-the-art facility: **Bendiro Profile Center i Falkenberg**. Here, expertise, advanced production technology, and innovative product development come together. As a growing company, we constantly strive to bring new skills into our operations. Our trainee program is an important part of this effort.

### **Our Vision**

Through continuous investment in both machinery and knowledge, Bendiro aims to maintain a market-leading position where the brand is synonymous with innovative and forward-thinking roll forming of the highest quality.

### **Proximity**

Working with us should be easy and efficient. We have a small and flat organizational structure with clearly defined responsibilities, which enables fast decision-making. Close collaboration also allows us to continually introduce new knowledge to get the very best out of every product.

### **Responsiveness**

We have extensive experience in developing customer-specific solutions and understand the importance of listening. Our engineers are highly skilled and experienced, which benefits our customers throughout the process—from concept to finished product.

### **Flexibility**

We currently operate one of Europe's most modern roll forming facilities, which enables us to be flexible and respond quickly to our customers' needs.

# Welcome to Bendiro - become a part of our team and help create the metal profiles of the future together with us.

## What does it mean to be a trainee with us?

- A trainee program for recent graduates with a Master of Science in Engineering and a strong passion for technology.
- The program is a full-time position lasting approximately 1.5 years, based in Falkenberg.
- It's divided into clear modules: Process, Product, Sales, and LEAN.

## What do you gain from the trainee program?

This is your chance to be part of our continued growth and innovation. You'll work in an environment where technology, innovation, and personal engagement are at the forefront.

- In-depth understanding of Bendiro's operations, with insight into different parts of the organization and access to broad and deep specialist knowledge.
- The opportunity to work at one of Europe's most modern roll forming plants.
- A tailored program that matches your ambitions with our needs.
- Ongoing mentorship from both the Production Manager and the CEO.
- Rotation between Bendiro's different companies.
- We provide housing.
- **After completing the program:** opportunity for continued employment within one of our businesses.

## Do you want to start your career at a company where your contribution truly matters?

As a trainee with us, you'll gain valuable experience and become part of a dedicated team where we support, develop, and challenge each other every day. We believe in the power of strong teamwork and are happy to share our knowledge so we can grow together.
